

**RESCO Model:**

- i. Under a conventional RESCO model, the consumer enters into a power purchase agreement (PPA) with a solar developer for a fixed period of time (usually 25 years.) The developer bears the capital expenditure for installing the solar system at the consumer's premises and charges the consumer a fixed tariff for the duration of the PPA.
- ii. Consumers interested in adopting solar under the RESCO model shall be encouraged to reach out to RESCO developers through the state solar portal and enter into direct contractual arrangements.
- iii. Apart from net metering benefits, MNRE capital subsidy for Group housing societies/residential consumers and Delhi's Generation Based Incentives (GBI) shall be available for all eligible consumers who adopt RESCO model.
- iv. To ensure time-bound mandatory installations of solar rooftop systems on all Delhi government buildings/properties with rooftop area of 500 sq.m. or above, GNCTD/its agency(s) shall aggregate demand and issue a centralized tender under both the CAPEX and RESCO model. For CAPEX model, the cost of installation and O&M will be borne by the consumer department.
